REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed subject matter in claims 1-38 is allowable because the prior arts of record fail to teach or fairly suggest the claimed :

"An equalizer for equalizing a return-to-zero (RZ) signal received from a communication channel, comprising:

(a) an equalizer core for equalizing the received signal and for updating tap values;

(b) a decision corrector for detecting and correcting misplaced pulses and double pulses in the equalized signal, wherein the decision corrector:

(i) comprises a zero assertion counter that generates a clock synchronized with the timing of the received signal, and

(ii) corrects the equalized signal by forcing zeroes in those portions of the equalized signal that the synchronized clock indicates should be RZ zeroes; and

(c) an error calculator that generates an error signal based on the outputs of the equalizer core and the decision corrector, and passes that error signal to the equalizer core,

and wherein the equalizer core updates the tap values based on the error signal received from the error calculator" as in claim 1; and

"A method of equalizing a return-to-zero (RZ) signal received from a communication channel, comprising:

Art Unit: 2611

(a) equalizing the received signal;

(b) generating and synchronizing a clock with the timing of the received signal;

(c) detecting and correcting misplaced pulses and double pulses in the equalized signal by forcing zeroes in those portions of the equalized signal that the synchronized clock indicates should be RZ zeroes, to produce a corrected signal there-from;

(d) calculating a timing error based on the equalized signal and the corrected signal; and

(e) updating equalizer tap values based on the calculated timing error" as in claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent number 7,023,941 issued to Rey et al. disclose joint equalization and timing recovery of the received Return-to-Zero signal..
